Sample Information

Sample ID	Farm ID optional	Crop 1	Crop 2	Crop 3	Crop 4	Plus Test \$15	Organic Matter \$15	Soluble Salts \$10	Sulfur \$10	Texture (USDA) \$30	Lab ID

†Plus test includes: soil pH, Mehlich-1 extractable phosphorus, potassium, calcium, magnesium, zinc, manganese, iron, copper, sodium, and boron. Fertilizer and lime recommendations are also included.

Proper Sampling is just as important as the analysis. Please visit our website for sampling instructions. A **6" depth sample**, comprised of 8 or more sub-samples, to represent no more than one 10 acre field, zone, or grid of interest is recommended for routine soil nutrients. Consistency in the 6" depth is very important.

Samples may be **shipped or dropped off** at address above.

If **sending check**, please attach to the submission sheet and ensure they are protected from the soil sample, and easily found in the shipping box. Please make checks out to **University of Tennessee**.

†The University of Tennessee collects and summarizes soil sample data for research and extension education purposes. By submitting this sample you, or your agent, agree to this action.
